Rule 11.5.5 Sanitation And Sterilization Of Tattoo And Piercing Equipment: No Certificate of Registration shall be issued or renewed to any individual, unless the establishment meets the following minimum standards:

1. All non-disposable tattoo and body piercing equipment shall be sanitized after each use by scrubbing thoroughly with a blood dissolving chemical and disinfectant solution, and then by being placed in an ultrasonic unit, which shall be operated in accordance with the manufacturer's instructions. After sanitizing the non-disposable equipment, each item shall be placed in an individual self-sealing sterilization pouch with indicators which shall be dated with the date of sterilization and sterilized in an autoclave.
2. All single use tattoo and body piercing equipment or jewelry requiring sterilization shall be placed in an individual self-sealing sterilization pouch with indicators which shall be dated with the date of sterilization and sterilized in an autoclave.
3. All sterilizing and sanitizing equipment, and all chemicals, must be kept in a room separate and apart from any work area, separated by walls or other configuration. All sterilizing and sanitizing equipment, and all chemicals, shall be cleaned, maintained, and stored in accordance with the manufacturer's instructions, which shall be kept available at the establishment.
4. Sterile equipment may not be used if the individual self-sealing sterilization pouch has been breached or after the expiration date, without re-sterilizing as required in these regulations.
5. After sterilization, all tattoo and body piercing equipment shall be stored in secure, dry, clean cabinets, or other secure covered containers reserved for the storage of such equipment.
6. Performance of the autoclave shall be checked once per month using Bacillus Stereothermophilus spore strips or suspensions and results recorded and maintained for a period of three years. If the autoclave fails

a performance check, the autoclave must be immediately checked for proper use and function and the spore test repeated. If the spore test remains positive, use of the autoclave shall be discontinued until it is repaired, and a repeat spore test is negative.

Rule 11.5.6 Tattoo Procedures: No Certificate of Registration shall be issued or renewed to any individual, unless the following tattoo procedures are followed:

1. Before beginning any tattoo procedure, the tattooist shall discuss the risks and responsibilities required in the particular procedure with the client. The tattooist shall also explain aftercare instructions prior to the tattoo procedure. The client shall then fill out and sign a client consent form for the tattoo, indicating that he consents to the procedure, understands the risks, understands the aftercare requirements, and has received written aftercare instructions. The original of the client consent form, along with a photocopy of a government-issued identification, shall be retained at the establishment as required in these regulations.
2. The tattooist shall thoroughly wash hands and forearms with antibacterial soap and warm water before and after each procedure. After thorough washing, the hands shall be dried using clean, single use paper towels.
3. The tattooist shall wear new, clean, single use, disposable sanitary latex examination gloves, or other type gloves approved by the Department, for every client during the procedure. If a glove is pierced, torn, or contaminated by coming into contact with any other person or non-clean surface, both gloves must be properly removed and discarded. Hands shall be washed prior to donning a new pair of disposable examination gloves. Gloves shall be discarded after the completion of each procedure on an individual client. Under no circumstances shall a pair of gloves be used on more than one person. The use of disposable gloves does not preclude the need for, or substitute for, the hand washing procedure.
4. Immediately before the procedure is to begin, the work procedure area shall be wiped down with a product classified by the United States Environmental Protection Agency (EPA) as a hospital disinfectant without label claim for tuberculocidal activity (low level disinfection) or greater, and covered with an uncontaminated paper towel or tray cover. All instruments and supplies needed for the procedure shall then be arranged on the paper.
5. Before beginning the tattooing procedure, the immediate and surrounding area of the skin which is to be tattooed shall be washed with an EPA-

approved antiseptic solution, applied with a clean, single use paper product.

6. If shaving is necessary, single use disposable razors shall be used and discarded. Following shaving, the skin and surrounding area shall be washed with an EPA-approved antiseptic solution, applied with a clean, single use paper product.
7. Upon completion of the tattoo procedure, the tattooist shall review the verbal and printed aftercare instructions with the client on the care of the tattoo.
8. If A&D ointment or other lubricant is utilized, it shall be from a collapsible or plastic tube or single-dosage unit, and shall be applied using sanitary procedures.
9. Transfer of Design.
 - a. Acetate stencil - No acetate stencil shall be used to transfer a design to the skin unless the acetate stencil is first thoroughly cleaned and rinsed in an approved surface disinfectant for at least twenty minutes, dried with a single use sponge, gauze pad or cotton ball(s) and placed in a sanitized package. An approved disinfectant for environmental surfaces and instrument shall mean an FDA approved high-level hospital grade disinfectant such as CIDEX
 - b. Paper stencil - If a paper stencil is used to transfer a design to the skin, the paper stencil shall be single use, disposable, and shall be used only once and then discarded.
 - c. Direct drawing - If the design is drawn directly onto the skin, the design shall be applied with a single use article only, which shall then be discarded.
10. Excess dye or ink shall be removed from the skin only with a single use sponge, towel, gauze pad or cotton ball, which shall be used only on one patron or customer, and then immediately discarded in a sanitary fashion. If there is blood combined with the excess dye or ink, then the sponge, towel, gauze pad or cotton ball shall be discarded in a bio-hazard bag.
11. After completing work on any person, the tattooed area shall be washed with a single use sponge, towel, gauze pad or cotton ball saturated with an EPA-approved antiseptic solution. The tattooed area shall be allowed to dry and A&D ointment or similar skin lubricant from a collapsible or plastic tube or single-dosage unit shall be applied, using sterile gauze. A sanitary dressing shall then be fastened to the tattooed area with adhesive, adhesive tapes, or strips.

12. Only A&D ointment or other lubricant in collapsible metal or plastic tubes, or single-dosage unit shall be used on the area subsequent to tattooing.
13. The use of styptic pencils, alum blocks, or other solid styptic to check the flow of blood is prohibited, unless the styptic is single use, used only once, and then properly disposed of.

Rule 11.5.7 Body Piercing Procedure: No Certificate of Registration shall be issued or renewed to any individual, unless the following piercing procedures are followed:

1. Before beginning any body piercing procedure, the body piercer shall discuss the risks and responsibilities required in the particular piercing with the client. The body piercer shall also explain aftercare instructions prior to the performance of the piercing. The client shall then fill out and sign a client consent form for the body piercing, indicating that he consents to the body piercing, understands the risks, understands the aftercare requirements, and has received written aftercare instructions. The original of the client consent form, along with a photocopy of a government-issued identification, shall be retained at the establishment as required in these regulations.
2. The body piercer shall thoroughly wash hands and forearms with antibacterial soap and warm water before and after each procedure. After thoroughly washing, the hands shall be dried using clean, single use paper towels.
3. The body piercer shall wear new, clean, single use, disposable sanitary latex examination gloves, or other type gloves approved by the Department, for every client during the procedure. If a glove is pierced, torn, or contaminated by coming into contact with any other person or non-clean surface, both gloves must be properly removed and discarded. Hands shall be washed prior to donning a new pair of disposable examination gloves. Gloves shall be discarded after the completion of each procedure on an individual client. Under no circumstances shall a pair of gloves be used on more than one person. The use of disposable gloves does not preclude the need for, or substitute for, the hand washing procedure.
4. Immediately before the procedure is to begin, the work procedure area shall be wiped down with a product classified by the United States Environmental Protection Agency (EPA) as a hospital disinfectant without label claim for tuberculocidal activity (low level disinfection) or greater, and covered with an uncontaminated paper towel or tray cover. All

instruments and supplies needed for the procedure shall then be arranged on the paper.

5. Before beginning the piercing procedure, the immediate and surrounding area of the skin which is to be pierced shall be washed with an EPA-approved antiseptic solution, applied with a clean, single use paper product.
6. If shaving is necessary, single use disposable razors shall be used and discarded. Following shaving, the skin and surrounding area shall be washed with an EPA-approved antiseptic solution, applied with a clean, single use paper product. Upon completion of the procedure, the body piercer shall review the verbal and printed aftercare instructions with the client on the care of the body opening.
7. Gloves shall be worn when cleaning blood spills.
8. A piercing gun may only be used on the outer perimeter or lobe of the ear, and may not be used on any other part of the body.
