

MSDH MIIX Immunization Interface Expectations

Each provider agrees to adhere to the following requirements as well as the specifications described in the HL7 Implementation Guide (the guide required by the regulation for “meaningful use” criteria for incentive funding under the Health Information Technology for Economic and Clinical Health [HITECH] Act).

1. Complete the Readiness Assessment form, MIIX User Agreement and Export Acceptance Agreement
 - a. A MIIX User Agreement must be submitted to request new users to be added
 - b. MIIX Remove User Forms must be completed to remove users no longer employed by the provider.
 - c. Users who have not logged on to the system in 30 days are subject to removal.
2. The provider will make available for all calls the necessary staff members (including a clinical and technical representative from each location, as well as a representative from the clinic’s EHR vendor.)
 - a. If the required staff are not present MSDH Interop Team will not continue with the call.
3. Submit accurate immunization results in a timely manner based on the Mississippi Rules and Regulations .
4. Transform the data to be submitted into Health Level Seven (HL7) transactions based on national standards
5. Include specific MSDH data elements that are required in the HL7 message.
6. Providers will participate in a parallel testing process during which time they will be required to enter the immunization records twice (into the EHR as well as into MIIX). Records need to be entered on the same day the vaccine is administered. If same day entry is not possible be sure they are entered by the end of the next business day.
